↳ PLUS

Microwash

Microwash is a highly breathable microfiber material designed to provide comfort and hygiene in industries such as food and healthcare, and to facilitate necessary cleaning. Its breathable polyurethane finish gives it a full-grain leather appearance while combining lightness and durability. Compared to natural leather, microfiber is 40% lighter, reducing fatigue even during long shifts. Another key feature is that it does not yellow when exposed to sunlight.

↳ SOLE

CITY Urban Style

City is recognized as a professional shoe with a unique and unmistakable style, ideal for those looking for a work shoe that can also be worn in many different situations, including during free time. It stands out for its special attention to the design of the upper and sole, as well as its retractable tread technology.
