

# TECHNICAL GUIDE STANDARD

## FUNCTIONS AND PROTECTIVE LEVELS

The norm EN ISO 20345:2022 defines the base and additional requisites (facoltative) of the safety footwear. Includes, between the others, mechanical risks, slipping's resistance. Thermal risks and ergonomic's behaviour.

## BASE REQUIREMENTS

 S	footwear ergonomics and comfort	 SR	resistance, safety and performance of materials
 S	toe cap impact 200J +15kN	 SR	slip resistance (ceramic floor +sodium laurylsulphate)

## ADDITIONAL REQUIREMENTS

 SC	scuff cap	 SR	slip resistance (ceramic floor + glycerine)	 WR	water resistant shoe
 FO	sole resistance o hydrocarbons	 E	energy absorption of seat reagion	 P	antiperforation midsole metallic nail (ø 4,5 mm)
 S	toe cap impact (200J + 15kN)	 A	antistatic footwear	 PL	antiperforation midsole metallic nail (ø 4,5 mm)
 S	slip resistance (ceramic floor +sodium laurylsulphate)	 WRU	water resistant upper	 PS	antiperforation midsole metallic nail (ø 3 mm)
 CI -17°C	cold insulation of sole complex -17°C	 HRO +300°C	heat insulation of sole complex	 LG	ladder grip
 CI -30°C	cold insulation of sole complex -30°C	 HI	outsole resistant to hot contact

### IDENTIFICATION CODES

<b>E</b>	Energy absorption of seat reagion	<b>HI</b>	Isolierung der Sohle vor Hitze
<b>A</b>	Antistatic footwear	<b>CI</b>	Outsole resistant to hot contact
<b>C</b>	Electrical resistance partially conductive footwear	<b>M</b>	Metatarsal protection
<b>P</b>	Antiperforation midsole non metallic nail ( $\phi$ 4,5 mm)	<b>AN</b>	Ankle protection
<b>PL</b>	Resistenza Alla Perforazione Inserto Non Metallico Chiodo ( $\phi$ 4,5 Mm)	<b>CR</b>	Cut resistance
<b>PS</b>	Antiperforation midsole non metallic nail ( $\phi$ 3 mm)	<b>LG</b>	Ladder grip
<b>WPA</b>	Water resistant upper	<b>SC</b>	Scuff cap
<b>WRU</b>	Water resistant upper	<b>SR</b>	Slip resistance (ceramic floor + glycerine)
<b>WR</b>	Water resistant upper		
<b>FO</b>	Sole resistance to hydrocarbons		
<b>HRO</b>	Heat insulation of sole complex
